Investor Deck

An AI-powered pitch deck that builds a complete 12-slide investor presentation from your startup profile — editable, shareable, and ready to present.

Key Features

- **AI-Generated Slides:** Click **Regenerate** to have AI build a full 12-slide deck from your startup profile data — cover, problem, solution, market, traction, team, financials, ask, and more (costs 10 AI credits)
- **Inline Editing:** Click directly on any text in a slide to edit it. Changes save automatically
- **Per-Slide Regeneration:** Not happy with a single slide? Click the magic wand icon in the slide toolbar to have AI rewrite just that one (costs 2 AI credits)
- **Visual Charts:** Data slides automatically include charts — TAM/SAM/SOM, revenue projections, use-of-funds breakdown, and traction metrics
- **Speaker Notes:** Each slide has optional speaker notes you can toggle on and off while reviewing your deck
- **Presentation Mode:** Click **Present** (or press **F**) to enter full-screen mode. Use arrow keys to navigate between slides. Press **Escape** to exit
- **PDF Export:** Click **PDF** to export your deck as a file (coming soon)

- **Shareable Investor Link:** Click **Share** to get a unique link hosted on your own site that anyone can view without logging in. You can enable or disable the link at any time

How to Use

1. Complete the Startup Wizard first — the deck is built from the data you enter there
2. On the Investor Deck page, click **Regenerate** to generate your deck
3. Browse slides using the left sidebar thumbnails, the Previous / Next buttons, or your keyboard arrow keys
4. Click on any text to edit it directly — edits save automatically
5. To rewrite a single slide with AI, click the magic wand icon in the slide toolbar
6. When ready to share, click **Share**, copy your investor link, and send it to investors

Tips

- Keep your startup profile complete and up to date — the more detail you provide, the stronger your AI-generated deck will be
- Use presentation mode when pitching live; use the editing view to refine your content
- You can regenerate the full deck as many times as needed as you refine your profile
- The shareable link requires no login and is hosted on your own company site, making it easy to send directly to investors
- Brand colors set in your startup profile are automatically applied to all charts in the deck
- Use the toggle in the Share modal to disable your investor link at any time without deleting the deck
