

Flying License — Startup Package

The Flying License is a startup-focused add-on that unlocks two exclusive tools — AirBeta and Investor Deck — on top of all Pro features, for a single one-time payment.

Key Features

- **AirBeta:** Recruit and manage beta testers with AI-powered application scoring, a referral leaderboard, 10 branded email templates, and a public application form hosted at your domain.
- **Investor Deck:** Build an AI-generated pitch deck using an 8-step guided wizard. Pulls live metrics directly from your Pilot data. Share with investors via a trackable link or export to PDF.
- **All Pro Features Included:** CRM & Contacts, Email Campaigns, AirShop, AirBooking, Client Portal, AI Chat, Gallery & DAM, and Custom Domain are all included.
- **One-Time Payment:** Pay once and get 12 months of access — no recurring subscription.
- **Existing Client Discount:** If you are already on a paid plan, you get \$100 off (\$399 instead of \$499).

How to Use

1. Open **Flying License** from the sidebar.
2. If you do not have the package yet, review the included features and click **Get Flying License** to purchase.
3. Once active, the dashboard shows two tiles — **AirBeta** and **Investor Deck**.
4. Click **Open AirBeta** to start recruiting beta testers for your product.
5. To create your investor pitch deck, click **Start Wizard** and complete the 8 steps: Business, Problem, Market, Product, Traction, Revenue, Team, and The Ask.
6. Your progress is saved at each step — return anytime to continue where you left off. The dashboard shows a progress bar with completed steps highlighted.
7. Once all 8 steps are done, click **Generate Deck**. When ready, use **View Deck** to preview or share it, and **Edit Data** to update your information.

Tips

- AirBeta and Investor Deck are exclusive to the Flying License — they are not available on any other plan.
- The Investor Deck automatically pulls live data from your account, so your metrics stay up to date without manual entry.
- The investor link you share does not require recipients to log in, making it easy to send to outside investors.
- Your beta tester application form is publicly accessible at your domain as soon as AirBeta is set up.
- Existing paid clients automatically see the discounted price (\$399) on the upgrade screen.
- You can leave the wizard and return later — your progress is tracked step by step.
